

» A RISK MITIGATION SUMMIT «

In today's threat environment, adequately addressing risk mitigation necessitates that banks think beyond the typical disaster recovery mentality, instead embracing a risk avoidance philosophy. Because enterprise risk mitigation is no longer about expecting the unexpected ... *it's about planning for it.*

Here at Jack Henry Banking, we've learned the lessons of disaster recovery first-hand, and we'd like to share that valuable knowledge with you during an interactive, strategic discussion led by experts.

You will learn about:

- Current risks facing community banks and their customers.
- Strategies to help community banks identify and mitigate risks.
- Protecting community banks' assets and reputations.
- The features and benefits of Jack Henry Banking's risk solutions.

Join us for this exciting discussion that will challenge the way you currently view risk mitigation, and will help you identify strategies to improve risk avoidance at your bank.
